

Taiga Tutorial

In order for the marker to gain access to our scrum project, a gmail account has been made for them.

1. Please go to <https://www.taiga.io/> and click Log in

Taiga: *The* free and open-source project management tool

For cross-functional agile teams to work effectively

A featured-rich software that offers a very simple start through its intuitive user interface.

Get Taiga for free

Millions enjoy agile with Taiga already, join them!

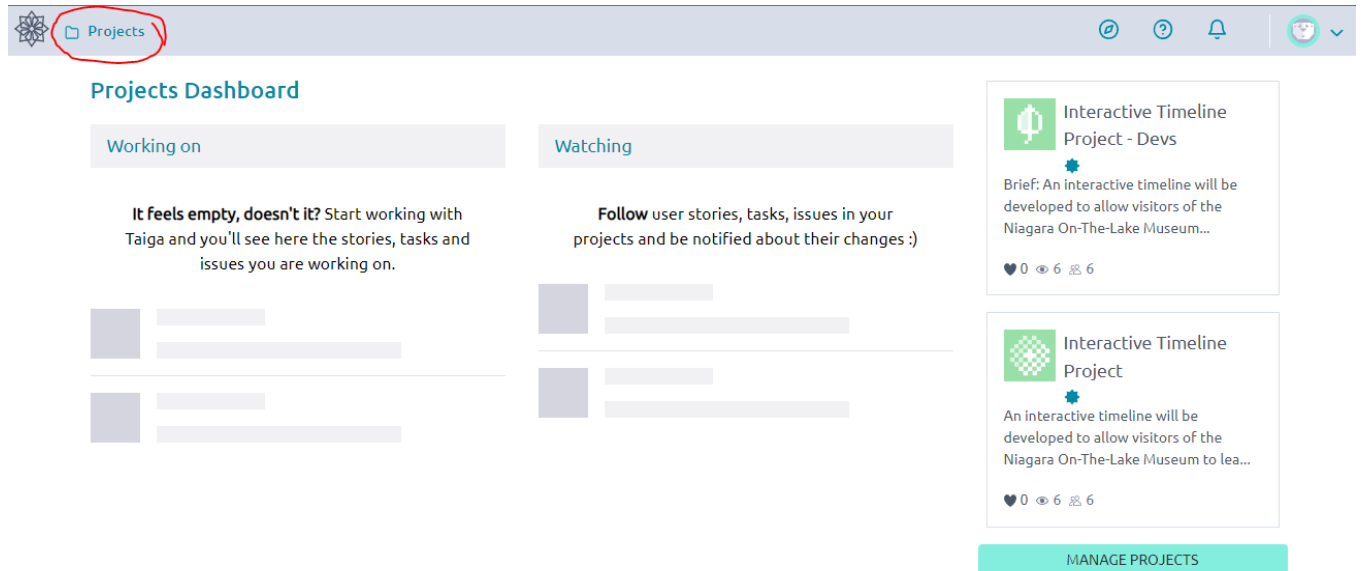

2. Please log in using the following credentials:

Username: Marker_4p02@outlook.co

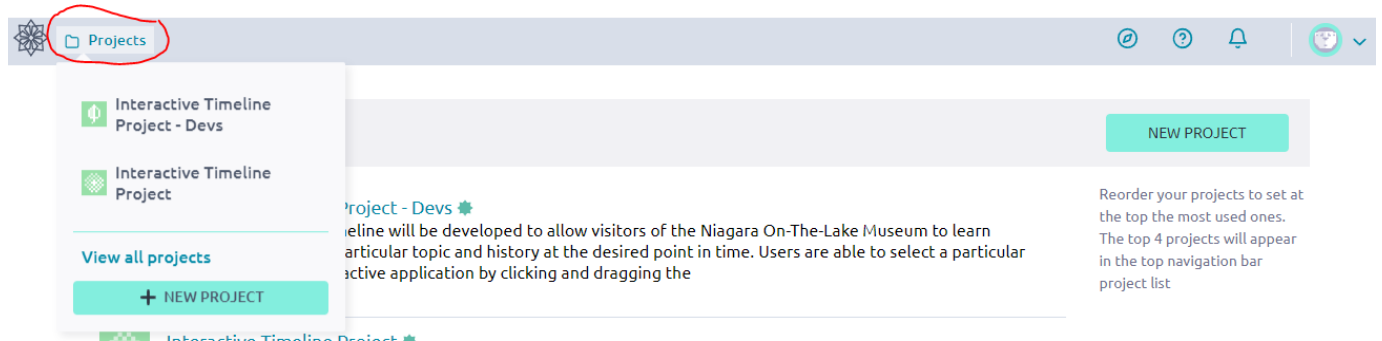

Password: Timeline

The image shows the Taiga login page. It has a teal background. At the top is the Taiga logo, followed by the text "Taiga" and "LOVE YOUR PROJECT". Below this is a login form with two input fields: one for the username, which contains the text "Marker_4p02@outlook.com", and another for the password, which contains a series of dots. To the right of the password field is a link that says "Forgot it?". At the bottom of the form is a green button labeled "LOGIN".

3. Once in, please select or hover over the **projects** button at the top left corner.

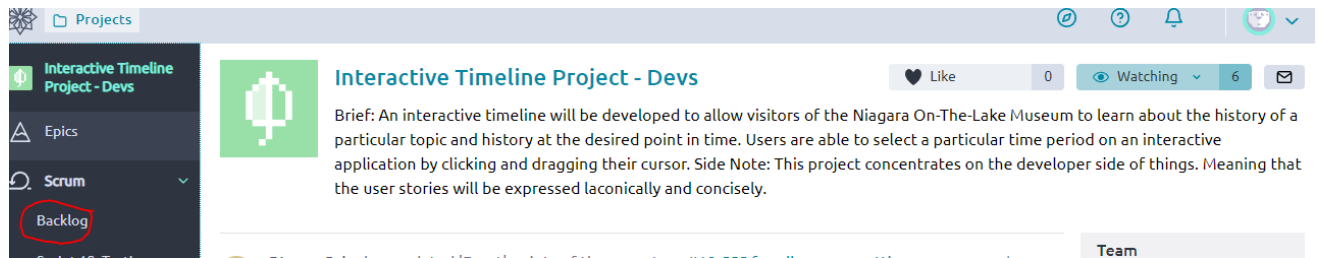

4. There will be two projects. The project is named "Interactive Timeline Project - Devs" which will be developer focused and the other project will contain the normal user stories. The difference between the two is that the user stories in the dev project are written as features as opposed to actual user stories.

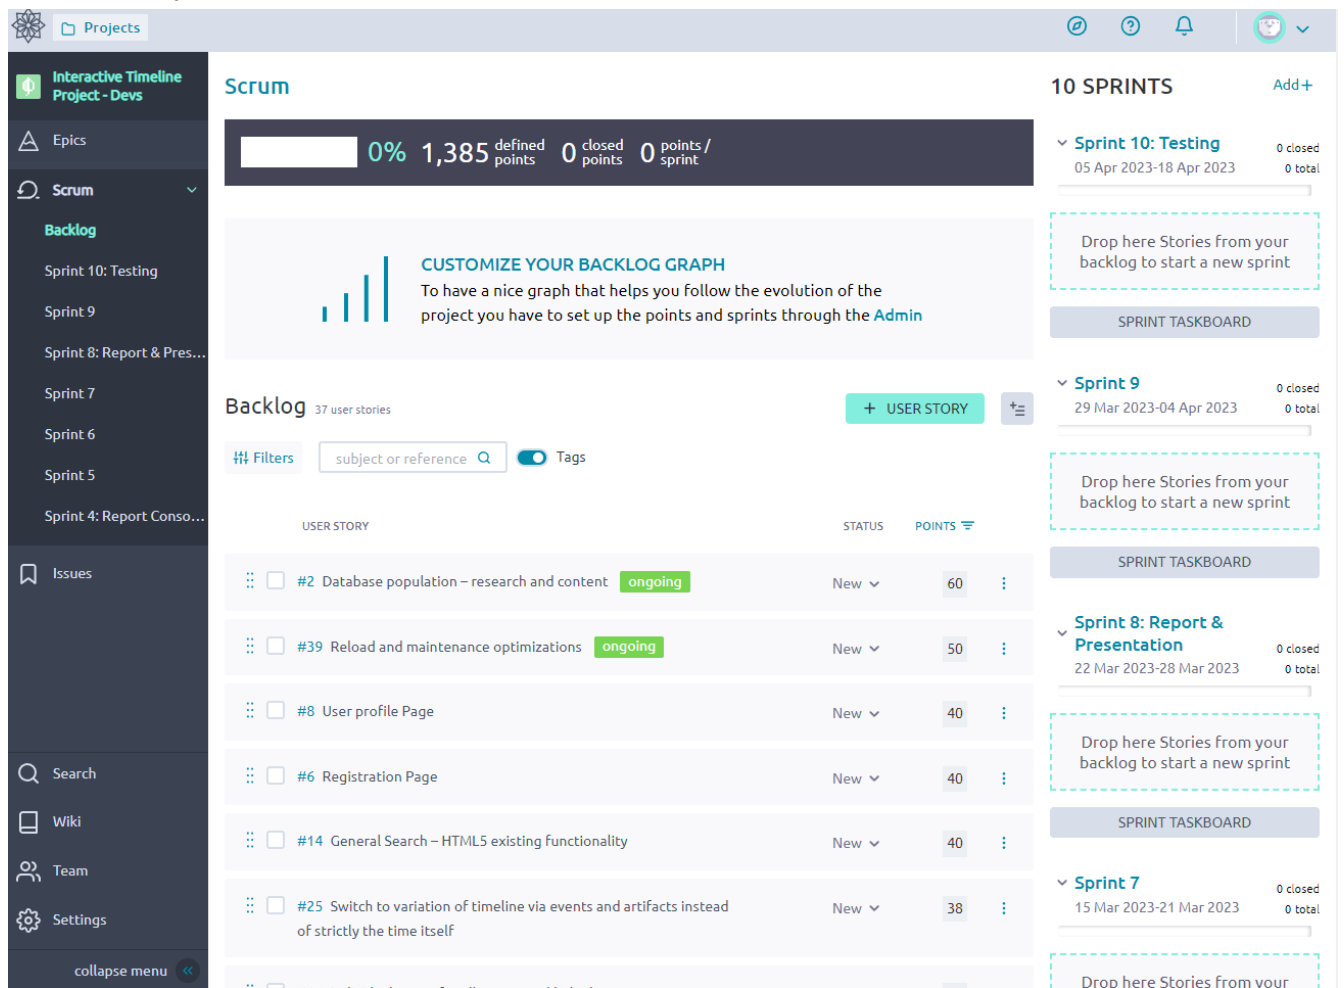

5. You can click on either but for the sake of this tutorial we will look at the "Interactive Timeline Project - dev".

6. Click on the “Scrum” button. A drop down menu will appear. From here you can click on the “Backlog” button

7. This will bring up an overview of the backlog of features and sprints. The backlog is in priority.

8. We can view an individual sprint by clicking on any on the right hand side. Scroll down and click on sprint 2.

The screenshot displays the Jira interface for the 'Interactive Timeline Project - Devs'. On the left, a sidebar shows navigation options: 'Epics', 'Scrum', and 'Backlog'. The 'Backlog' section is active, showing a list of user stories. The main area is titled 'Backlog' and contains a table of user stories. A search bar and a 'Tags' toggle are at the top. On the right, a 'SPRINT TASKBOARD' is visible, showing a list of tasks for 'Sprint 2', which is circled in red. The taskboard includes a progress bar and a summary of tasks.

USER STORY	STATUS	POINTS
<input type="checkbox"/> #27 Calendar function (users – for now) – book and cancel tours	New	10
<input type="checkbox"/> #26 Calendar function (users – for now) – book and cancel viewing times	New	10
<input type="checkbox"/> #36 Toggle the amount of time displayed – preferably through scroll or select	New	10
<input type="checkbox"/> #37 Keyboard access to everything	New	8

SPRINT TASKBOARD	
Sprint 2 08 Feb 2023-14 Feb 2023 0 closed 220 total	
#1 Database Creation	60
#5 Introductory timeline – horizontal	50
#16 Scroll functionality	50
#40 Web rendering optimization	60

9. Here we can view all the user stories / features and their progression.
